REPORT

CD NO.

East Germany

13 June 1993

1. The Radio Station at Koenigswusterhausen NO.
2. Russian Interest in East German Radio Installations

2

NO. OF ENCLS.
(LISTED BELOW)

25X1

**SUPPLEMENT TO
REPORT NO.**

THIS MESSAGE CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT OF 1917, U.S.C. 11 AND 38, AS AMENDED. IT IS TRANSMITTED TO THE ADDRESSEE OF THE MESSAGE IN MY CAPACITY AS AN EMPLOYED PERSON IS PROHIBITED BY LAW. TRANSMISSION OF THIS MESSAGE IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1

1. Construction of a second protective wire fence around the property of Main Radio Station Koenigs-Wusterhausen has been cancelled owing to the impossibility of providing the necessary 8 kilometers of wire fencing.
2. The sum of 140,000 DME, which was set aside for repairs on the radio station during 1954, has been entirely used up. The 1955 budget provides only 14,000 DME for such repairs.
3. The two 100-meter transmitting towers, dismantled some time ago, are being reinstalled at Mahlow near Schwerin to serve as 80-meter shortwave transmitters. In Koenigs-Wusterhausen it was, however, officially announced that the towers were to be installed on Ruegen.
4. The current-producing generators, disabled some time ago, have now been replaced with new generators. Current supply for the station is now assured from its own sources.
5. On 3 or 4 February, a mixed Russian-German delegation from Potsdam is expected to arrive at the station. The delegation will include Russians, including technical experts, and representatives from the Ministry of Posts in Berlin. The task of the commission is to make surveys and measurements for the future transmitting installations at Zeesen.
6. On 7 January 1955, twenty Russian high-frequency technicians and physicists arrived at the Kolberg Research Station in Kreis Koenigs-Wusterhausen. Their families are to be housed in the neighborhood of Kolberg. The research station is currently developing a new transmitter and receiver for the People's Police or for the MVD.
7. The Main Telegraph Office on Oranienburger Strasse, Berlin, is now constructing a new diesel installation for electric current production; it will have double the capacity of the former installation. It is not essential for present needs; but its construction was justified on the ground that the East German Government must be able to provide, in Berlin, sufficient current production for the increased demands when West Germany is taken over by East Germany (sic).

8. The Main Administration of the Border Police in Pasts has received four towers for microwave transmissions. The machinery for these installations was delivered by the Hochfrequenzwerk Leipzig. Leipzig engineers will install them.
